

OPTICS

1. Wave motion, wave equations
2. Electromagnetic waves
3. Reflection and refraction of waves
4. Waveguides, optical fibers
5. Interference of waves
6. Geometrical optics
7. Fourier optics
8. Dispersion
9. Coherence
10. Diffraction Gaussian beams
11. Fraunhofer diffraction
12. Fresnel diffraction
13. Optical anisotropy
14. Optical modulation
